## 1. UNIVERSITY VISION AND MISSION

### Vision

- Xiamen University Malaysia aspires to become a university with a distinct global outlook, featuring first-class teaching and research, and embracing cultural diversity.

### Mission

- To nurture young talents with dignity and wisdom, turning them into fine citizens of the region who will contribute to the prosperity of the people and social progress of Malaysia, China and Southeast Asia.

## 2. PROGRAMME AIMS

To produce qualified Traditional Chinese Medicine (TCM) practitioners who are skilled, competent and compassionate, leading them to practise in a safe and practical manner. The programme also aims to develop TCM practitioners who are able to use problem-solving techniques and critical analysis in the management of patients, as well as to use evidence-based knowledge in their practice. This programme will also impress on the need for continual professional development, embedding habits to engage in independent and lifelong learning.

### 3. PROGRAMME EDUCATIONAL OBJECTIVES (PEO)

The PEOs are to produce graduates who are:

- |             |                                                                |
|-------------|----------------------------------------------------------------|
| <b>PEO1</b> | Treat common diseases with Traditional Chinese Medicine;       |
| <b>PEO2</b> | Have good medical social service ability;                      |
| <b>PEO3</b> | Have strong ability of scientific research and academic level; |
| <b>PEO4</b> | Have a further development medical management level;           |
| <b>PEO5</b> | Practice medicine in accordance with medical ethics and law.   |

#### 4. PROGRAMME LEARNING OUTCOMES (PLO)

At the end of the programme, graduates will be able to:

|              |                                                |                                                                                                                                                                                   |
|--------------|------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>PLO1</b>  | <b>Knowledge and Understanding</b>             | Describe the history and knowledge of TCM, and to recognize the thoughts and experience of outstanding physicians in history.                                                     |
| <b>PLO2</b>  | <b>Cognitive Skills</b>                        | Apply fundamental concepts and theories in both TCM and Western medicine to identify the etiology in various types of diseases and propose principles of diagnosis and treatment. |
| <b>PLO3</b>  | <b>Practical Skills</b>                        | Formulate treatment skill of TCM and recognize medical emergencies and respond appropriately.                                                                                     |
| <b>PLO4</b>  | <b>Interpersonal Skills</b>                    | Develop strong interpersonal skills in clinical practice.                                                                                                                         |
| <b>PLO5</b>  | <b>Communication Skills</b>                    | Develop effective physician-patient communication skills and awareness of cultural competence to achieve the good treatment outcomes.                                             |
| <b>PLO6</b>  | <b>Digital Skills</b>                          | Apply digital technology in disease diagnostics, prevention and healthcare management.                                                                                            |
| <b>PLO7</b>  | <b>Numeracy Skills</b>                         | Develop statistical proficiency to perform medical data analysis for clinical service improvement.                                                                                |
| <b>PLO8</b>  | <b>Leadership, Autonomy and Responsibility</b> | Acquire the leadership skills.                                                                                                                                                    |
| <b>PLO9</b>  | <b>Personal Skills</b>                         | Recognize the need for lifelong learning and continuously seek new knowledge to enhance academic ability.                                                                         |
| <b>PLO10</b> | <b>Entrepreneurial Skills</b>                  | Apply management and entrepreneurial skills to adapt the ever-changing and competitive society.                                                                                   |
| <b>PLO11</b> | <b>Ethics and Professionalism</b>              | Possess legal consciousness, ethical awareness, and professionalism.                                                                                                              |

#### 5. EXPECTED AREAS OF GRADUATE EMPLOYMENT

Independent practice, self-employment, employment in a multidisciplinary healthcare provider, teaching and research in careers such as Chinese Medicine Practitioner, Acupuncturist, Wellness Therapists, Consultant or expert in the healthcare field, Chinese medicine herbalist, a member in the sale and marketing of Chinese Medicine products, Chinese healthcare products development or marketing staff, Import-export business in herbs and healthcare products, Chinese Medicine educator, Researcher in an academic institution or herbal or pharmaceutical manufacturing company.

## 6. CURRICULUM STRUCTURE

The minimum requirement for graduation will be **185** credits, with all the components meeting the minimum credit values specified in Table 1.

Table 1: Components of the Programme and its Value

|   | Course Classification     | Credit Value | Percentage (%) |
|---|---------------------------|--------------|----------------|
| 1 | Compulsory Courses        | 12           | 6.5%           |
| 2 | Basic Medical Sciences    | 24           | 13.0%          |
|   | Discipline                | 99           | 53.5%          |
|   | Scientific Methods        | 7            | 3.8%           |
|   | Clinical Training         | 24           | 13.0%          |
| 3 | Humanities                | 8            | 4.3%           |
| 4 | General Elective          | 11           | 5.9%           |
|   | Major Elective            | 0            | 0%             |
|   | <b>Total Credit Value</b> | <b>185</b>   | <b>100.0%</b>  |

## Compulsory Courses

Compulsory Courses refer to *Mata Pelajaran Pengajian Umum (MPU)*, or General Studies, which is a compulsory component of undergraduate education in Malaysia as mandated by the Ministry of Higher Education (MoHE), as shown in Table 2a below.

MPU aims to develop well-rounded graduates by complementing academic studies with broader knowledge, essential skills, ethical values, and social responsibility. Through courses that promote critical thinking, effective communication, integrity, and community engagement, MPU prepares students to become responsible citizens and lifelong learners in an increasingly interconnected world.

Table 2a: Components of the **Compulsory** Courses and its Value

| No.                                                                                                          | Name of Course                                             | Course Code | Credit Value | International | Malaysian                                                                                                                                                         |

## General Elective Courses

General Elective Courses refer to courses designed to give students options beyond their major-related courses in order to diversify their scope of knowledge.

Students in Science field can choose courses they are interested in from Group I (Arts) and Group II (Business) and Group IV (Artificial Intelligence) as shown in Table 2b. Students in Traditional Chinese Medicine shall achieve at least a total of 11 credits with each group meets the minimum requirement of 1 course.

Table 2b: Components of the **General Elective** Courses and its Value

| No.                                                  | Name of Course                                                                                                                                                                                                           | Course Code     | Credit Value | Remarks          |
|------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|--------------|------------------|

## 7. LIST OF COURSES OFFERED FOR EACH ACADEMIC YEAR

There are three (3) semesters in each academic year: two (2) long semesters and one (1) short semester. The sequence of course registration varies according to the intake:

Students should be aware that the total number of credits shall not exceed **20** for long semester and **7** for a short semester.

It is important to note that the arrangement of courses for each academic year listed below is subject to change based on programme needs or institutional requirements.

| Year   | Semester                      | Course Name                                              | Course Code       | Classification         | Credit |
|--------|-------------------------------|----------------------------------------------------------|-------------------|------------------------|--------|

|             |                                                               | TCM101 Diagnostics of Traditional Chinese Medicine (I/II) |
|             |                                                               | TCM205 Science of Chinese Materia Medica                  |
|             |                                                               | MED203 Science of Prescriptions                           |
| TCM404      | Orthopaedics and Traumatology of Traditional Chinese Medicine | MED113 Anatomy                                            |
|             |                                                               | TCM205 Science of Chinese Materia Medica                  |
|             |                                                               | MED203 Science of Prescriptions                           |
| TCM405      | Gynaecology of Traditional Chinese Medicine                   | TCM319 Internal Medicine of Traditional Chinese Medicine  |
| TCM411      | Pediatrics of Traditional Chinese Medicine                    | MED102 Basic Theory of Traditional Chinese Medicine       |
|             |                                                               | TCM101 Diagnostics of Traditional Chinese Medicine (I/II) |
|             |                                                               | MED203 Science of Prescriptions                           |

**Note: Students must successfully complete and pass all courses from Year 1 to Year 4 as a prerequisite for undertaking the final-year internship. This regulation is mandatory to ensure that students have acquired the essential knowledge and competencies, and are fully prepared for safe and effective clinical training.**

学生必须完成大一至大四的所有课程并取得及格成绩，方可进入最后一年的临床实习。本规定旨在确保学生在进入临床实习之前，已系统掌握必要的知识与技能，并做好充分准备，以保障临床学习的安全性与有效性。

## 9. IMPORTANT NOTE

### Threshold Requirement

A grade threshold refers to the minimum number of marks that a student needs to obtain in a particular component of the course.

Traditional Chinese Medicine students must obtain a threshold mark of 50 in all the assessment components, including the final examination, and an overall mark of 55 or above to pass a core / major/ elective course.
